INTERNSHIP

Edunet Foundation	10 February 2025 - 21 March 2025
• During the internship period, I worked on a project that enables users to check a restaurant's details and their food services. The project has two main users, a buyer and a restaurant owner. The restaurant owner is responsible for managing the restaurants details and the food service they offer. The project consists of frontend source code and backend API. • The technology stack included Frontend (React JS, Bootstrap, and CSS, and deployed on Netlify), and Backend (Node JS, Express JS and Mongo Atlas and deployed on Render).	

PROJECTS

Engineer Technotes (https://github.com/rajgupta2/Engineer https://rajgupta2.github.io/Engineer/)
• I developed a user-friendly web app to access learning resources. • Technologies used: Node JS, React JS, Next JS, Git, GitHub, and Tailwind CSS.
Study Student (https://github.com/rajgupta2/StudyStudent https://studystudent.onrender.com/)
